

NP+ Focus Supports Patient Care Goals

NursePro Plus has streamlined our service to become a balanced solution for facilities. We are (100%) focused on IV access placement. Our nurses are highly trained, competent, and experienced. Due to our focus, we have created efficiencies which enable us to provide quality health care services that are cost-effective for our customers.

The National Standard for IV Drug Delivery via a Central Line

(INS Standards)

Any drug with a pH less than (5) or greater than (9), any drug with an osmolality greater than (600), dextrose concentrations greater than (10%), continuous infusions of vesicant medications, inotropic therapies, and any therapy lasting longer than (7) days.

Benefits of Compliance with (INS) Standards

- Increase in patient safety
- Patient comfort increased by not starting multiple peripheral IVs
- Decreased liability
- Increase in patient outcomes and quality care
